

SANKET CHAUDHARI

DevOps Engineer

Pune, Maharashtra, India | 7588021028 | sanketchaudharidev@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience in CI/CD pipeline implementation, AWS cloud infrastructure management, and enterprise application deployment. Skilled in Jenkins, Docker, Kubernetes, Ansible, and Terraform, with hands-on experience managing Dev, QA, UAT, and Production environments across insurance, AdTech, and AI/SaaS platforms. Strong background in troubleshooting, release coordination, and infrastructure automation.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, VPC, IAM, Route 53, SNS, CloudWatch, Load Balancer, EFS, Auto Scaling, ELB, RDS); currently studying EKS, Lambda, API Gateway, CloudFormation

CI/CD & Automation: Jenkins (Declarative Pipelines), GitLab CI/CD, GitHub Actions, Ansible, SonarQube Integration, Release & Deployment Automation

Containerization & Orchestration: Docker, Docker Compose, Kubernetes, 3 Tier Microservices Architecture.

Infrastructure as Code: Terraform, CloudFormation (conceptual)

Scripting & Configuration: Bash/Shell Scripting, Python, Groovy, YAML, JavaScript, Node.js

Monitoring & Observability: AWS CloudWatch (Dashboards, Alarms, Events), CloudTrail, Custom Node.js Health-Check Scripts

Networking: VPC, Subnets, Internet Gateway, Route Tables, Load Balancers, DNS, Route 53, CloudFront

Databases: MongoDB (Connection Pool Monitoring & Tuning), MySQL, Oracle 11g, AWS RDS

Web/App Servers: Apache Tomcat, Apache HTTP Server, Nginx

Build & Package Management: Maven, npm, pip

AI-Assisted Development: Google Gemini API, Generative AI, Agentic AI, Cursor, Windsurf, Claude AI.

Version Control & Collaboration: Git, GitHub, GitLab, Jira, Slack

Operating Systems: Linux, Windows

PROFESSIONAL EXPERIENCE

Pre-Production Analyst, DevOps Operations

Apr 2026 – Aug 2026

blkbox.ai | Remote, Pune, India

Project: BLKBOX — AI-Powered Creative Intelligence & Marketing Platform (AdTech/MarTech, SaaS, Microservices Architecture)

- Working on Pre-Production environment management and performing deployment validation for microservices-based applications
- Supporting CI/CD workflows using Jenkins and GitLab for application build and deployment processes
- Working with Kubernetes and Docker for containerized application deployment and management
- Working with Terraform for infrastructure provisioning and configuration management
- Monitoring Linux-based environments, application services, deployments, and system health
- Creating and configuring SonarQube integration with Jenkins CI/CD pipelines for code quality analysis and quality gate validation
- Performing builds and deployments, tracking pipeline errors and failures, and coordinating with the Development team for issue resolution
- Deploying applications across Pre-Production environments and ensuring applications are up and running successfully
- Troubleshooting environment-related issues, deployment failures, CI/CD pipeline issues, and application service issues on a regular basis
- Making environment-specific configuration changes in applications as requested by Development and QA teams
- Performing request-based deployments and hot deployments across application environments
- Collaborating with Development and QA teams for release coordination, deployment activities, troubleshooting, and operational support
- Preparing deployment and transition documents for knowledge transfer and other team members

DevOps Engineer

Mar 2025 – Apr 2026

Tieto Software Technologies | Pune, India

Project: PREMIA 9 — General Insurance Product

- Used CloudFront for low latency URLs

- Created IAM groups, roles, and policies
- Created CloudTrail for monitoring user activity for compliance purposes
- Created MySQL DB in RDS and maintained its backups and read-replicas
- Created VPC peering connections between QA and UAT networks for private subnets
- Prepared transition documents for other team members
- Actively participated in weekly/daily status calls with the client
- Launched and maintained instances for Dev, QA, and UAT environments
- Deployed applications to all environments and ensured they were up and running
- Performed daily builds, ran unit test cases written by developers, tracked errors/failures, and coordinated with the Dev team
- Made environment-specific changes in the application as requested by QA/UAT
- Performed request-based hot deployments and full deployments on servers
- Troubleshoot issues related to environments on a regular basis
- Provided support to the Performance team
- Created Jenkins CI/CD pipelines for all branches

DevOps Engineer

Jun 2024 – Feb 2025

AIQOD | Pune, India

AI Startup — MERN-Stack & Generative AI Products (Sole DevOps Engineer)

- Owned the setup and management of Development, UAT, and Production environments, including database configuration and application deployment using Jenkins CI/CD pipelines on an on-premise private server
- Designed and implemented Jenkins Declarative CI/CD pipelines for 3+ applications, covering MERN-based applications and Python AI services, supporting zero-downtime releases across Dev, UAT, and Production
- Built and managed Docker-based environments for complete MERN applications and Python-based AI chatbot microservices using Docker Compose, enabling consistent and reproducible application setups across environments
- Managed AWS infrastructure and services, including EC2 instance provisioning, S3 storage lifecycle management and storage-class transitions, Route 53 DNS configuration, and ELB high-availability setup
- Deployed and maintained Python-based Generative AI chatbot microservices, working closely with the ML team to containerize model-serving environments and ensure compatibility of required libraries and dependencies
- Developed a Node.js-based database connection monitoring solution to identify MongoDB connection-pool exhaustion under high load, implementing corrective measures that resulted in zero database-related downtime for 3+ months
- Implemented and managed a secure credential distribution process with manager approval controls, ensuring controlled access and maintaining audit compliance

DevOps Intern

July 2023 – May 2024

Zeta IT Solutions | Bangalore, India

- Gained hands-on exposure to core AWS services including EC2, S3, IAM, and VPC as part of internship training
- Learned to launch and configure EC2 instances, manage S3 storage buckets, and set up basic IAM users, groups, and permissions
- Practiced fundamental Linux system administration, including file system navigation, permissions, and basic Shell scripting
- Assisted the team with day-to-day environment monitoring and documentation under senior engineer guidance
- Built foundational understanding of cloud infrastructure concepts and DevOps practices, preparing for hands-on DevOps engineering roles

EDUCATION

B.E., Computer Engineering

North Maharashtra University | June 2023

CERTIFICATIONS

- AWS: Zero to Hero — trainwithshubham.com

PROJECTS

Mystic Expedition — Android Game

Independently designed and built a full Android game from scratch using AI-assisted development (vibe coding) in an AI-powered IDE — planning game mechanics, prompting to generate and refine code, and testing through to a complete, playable build.

- Planned game structure, mechanics, and flow before development, then used AI-assisted prompting in an AI IDE (Cursor/Windsurf) for code generation, debugging, and iteration
- Built and tested the complete game independently, demonstrating applied AI-assisted / agentic development skills beyond core DevOps work.

Shorts Automation Pipeline

End-to-end automation system for scheduling, uploading, and tracking YouTube content performance.

- Built a Python automation pipeline that batch-processes video metadata (titles, descriptions, tags) and schedules uploads via the YouTube Data API v3, eliminating 3–4 hours of manual work per batch.
- Implemented analytics pull — fetching view count, watch time, and CTR per video into a CSV report, enabling datadriven content decisions.

DECLARATION

I confirm that above information is correct to the best of my knowledge & belief.
